Next-level learning

IESE Business School Insight magazine #164 explores how to develop learning in your organization based on IESE research and practitioner experience.

May 1, 2023

Becoming an agile, innovative organization depends on your ability to learn. Here's how to build future-ready skills and competencies that will take you higher.

Plus: The Energy Pattern Explorer tool. Ex Dutch PM Jan Peter Balkenende says the future depends on partnership for the Sustainable Development Goals. Resources to get you out of your comfort zone. How businesses can use the data that users generate while interacting with technology to improve the user experience and even detect fraud. Putting a price on pollution. Here's how to create workplaces where people bring their whole selves to work and where even the misfits thrive. Lessons for creating beauty and personal growth from ikebana, the Japanese art of flower arrangement.
