

FELLOWSHIP APPLICATION

PhD in Management

IESE is offering a limited number of full fellowships to outstanding students wishing to pursue the PhD in Management.

Presentation of applications:

Applications should be uploaded to the EMBARK system in "Other documents", together with the other required documents before the deadline (for admission for the following academic year, starting in September).

The application for fellowship will be examined by an Academic Committee, who will base their decision on the academic achievement of applicants and their potential contribution to the selected area of research.

Amount and form of payment

The fellowship covers tuition fees and living expenses for up to 2 years conditional upon satisfactory academic performance.

The financial support package includes the annual tuition fees of 30.000€ and a yearly stipend to cover living expenses of 19.920€.

Each fellowship will be paid on a monthly basis, from September to the following August.

After concluding the MRM Program, students have to apply for a fellowship once admitted to the PhD Program.

Fellowship conditions

These fellowships do not create any employment relationship with IESE nor do they imply that IESE will necessarily hire fellowship holders in the future.

Students are expected to be actively involved in research activities with faculty members after completion of the first year.
