### Teaching and Curricular Achievements

IESE Business School:

- *Entrepreneurship Course*. Taught in 5 different programs, including the MBA, EMBA, and Executive Programs such as the Program for Management Development (PMD), and the Advanced Management Program (AMP). This course develops the main concepts of entrepreneurial management. It pursues two main objectives. First, it aims at enabling

---

<sup>2</sup> Granted to “early career academics who have already made outstanding research contributions in the area of organizations and the natural environment, and who appear to have a strong potential to continue making such contributions in the near future.

participants to turn an idea into a revenue-generating business. Second, the course makes the process of entrepreneurship clear and understandable.

- *Sustainable Entrepreneurship in MBA and GEMBA*. This course examines key concepts of entrepreneurship, using the Sustainable Development Goals (SDGs) as guiding principles. It explores how new ventures, non-profits, and other companies address and advance the SDGs through their innovation.
- *Contemporary Topics in Entrepreneurship, Social Change, and Governance in Master of Research in Management program*. This course seeks to provide a deep understanding of the linkages between entrepreneurship, social change, and governance. It is built from the premise that governance is a central and foundational topic in assessing how entrepreneurial action can contribute to the public good. It also examines important interdisciplinary research at the intersection of entrepreneurship and social change, including social and environmental entrepreneurship, gender issues, impact investing, institutional change, industry development and evolution, and field experiments, amongst others.
- *Corporate Entrepreneurship, in EMBA program*. This course provides an understanding of how corporations apply and structure innovation and the challenges, and possible mitigation, of these efforts. Students become familiar with different ways of organizing for open innovation and more specifically, how corporations work with startups. Students apply the entrepreneurial mindset in a corporate context and understand the alternatives to scan outside the firm for innovation. They also explore the entrepreneurial ecosystem that supports and enhances this activity.

Portland State University:

- *BA 495: Business Capstone- Business Strategy, Winter 2010-present (Average instructor rating 4.5 on a 5.0 scale)*. This course takes a unique approach to business strategy by integrating the principal aspects of strategic management and entrepreneurship while students apply these concepts in a Capstone project with local firms and organizations. Students also learn important aspects of entrepreneurship such as feasibility analysis and incorporate them into these consulting engagements. Projects typically address social, environmental, and diversity aspects.
- *MGMT 562: MBA Business Strategy & Policy, Fall 2011*

University of Colorado:

- *MGMT 4000: Strategic Management, Fall 2007*. (Instructor effectiveness average rating = 5.1 & median rating = 5.5 on a 6.0 scale. College Average: 4.8.)
- *ESBM 3700: Entrepreneurial Environments, Spring 2006*. Overview of entrepreneurship, addresses topics such as opportunity recognition, sources of funding, alternative entrepreneurship such as franchising and corporate entrepreneurship, and managing rapid growth.
- *MBAX 6100: Entrepreneurship & Small Business Management, Spring 2007*. Teaching assistant. Examines the environments of entrepreneurial firms from start-up to

development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

- *ENVS 1000: Introduction to Environmental Studies*-recitation, Fall 2002-2003, Spring 2003-2004. (Instructor effectiveness rating = A.)
