

Online session:
Technology and Finance

Monday, 22 November, 2021 – 16:00h to 18:00h CET

Technology is disrupting finance, both in markets and intermediation, posing challenges for both regulators and actors in the private sector. Many questions arise, not least what are the benefits and costs of the application of digital technology in finance. The report will study, among other topics and issues, payments, CBDC and technology applications (such as big data and machine learning) in asset management, trading and investment.

PROGRAM

16:00-17:00 Presentation of *preliminary* results by the authors of the report
